

Fully Renewable Upholstery

Lasts Longer. More Versatile. Easy Replacement.

The renewable system allows you to replace your chair, loveseat, or sofa parts without purchasing an entirely new piece. Renewable seating extends the life of your furniture while saving you money and giving you more versatility.

Should your seating become worn, fully renewable products allow the arm, feet, cushion, base, or fabric to be replaced easily and quickly at the furniture location. Extending the life of furniture ultimately reduces contribution to the waste on our planet, making it environmentally friendly.
