

How does Butler compare to retail?

We build our furniture to perform in high-traffic, heavy-use environments like healthcare and social service settings. Because we engineer our seating to be stronger, it will last longer than retail. We prioritize durability when designing and building our furniture while keeping ergonomics, lifestyles, and comfort in mind. We specialize in furniture that embraces the needs of community living, group homes, shelters, and firehouses. Therefore, we are confident that we can supply products exceeding your expectations but not your budget.

We pride ourselves in quality workmanship so much that our warranties surpass those of retail upholstery seating.
