

Protect your investment.

How to care for your fabric.

Fabric: Sherpa & Shire
Type: Woven

CLEANING INSTRUCTIONS

WS: Treatment depends on the stain

Spot clean **water based** stains with a water-based shampoo or foam upholstery cleaner.

For **oil based** stains, spot clean with a water-free cleaning solvent.

Always pretest a small, inconspicuous area before proceeding. Do not saturate. Pile fabrics may require brushing with a non-metallic, stiff-bristle brush to restore appearance. Hot water extraction or steam cleaning is not a recommended cleaning method. Cushion covers should not be removed and laundered or dry-cleaned.

To prevent overall soiling, frequent vacuuming, or light brushing with a non-metallic, stiff-bristle brush to remove dust and grime is recommended. When cleaning a spill, blot immediately to remove spilled material. Clean spots or stains from the outside to the middle of affected area to prevent circling marks. Use a professional furniture cleaning service when overall soiling needs to be addressed.

The results for the cleaners/disinfectants listed does not imply "approved" or that the results are guaranteed. These evaluations are indicators after laboratory testing and may not be indicative of field performance. Customers should first determine if products are appropriate for use on their surfaces.

The majority of today's disinfectant chemistries are mainly designed for use on hard environmental surfaces such as ceramic, porcelain, laminate, steel etc. After each application these types of disinfectants on seating surfaces the surface must be wiped with clean water and dried with a clean towel to remove any chemical residue that could eventually discolor or degrade the material surface. Failure to follow the above dilution recommendations, directions when using these types of cleaners/disinfectants or the application of a clean water rinse after each application can expedite a product failure and will void any warranty claim.
