

Furniture

Designed Better

Every day, you support people in recovery, seeking safety, or building stability in shared housing. You shouldn't have to worry about furniture that can't keep up.

At Butler Human Services, we've been building durable furniture since the 1980s—designed for heavy use, shared spaces, and long-term value. We help you reduce costs while creating comfortable, dignified environments, all backed by a strong warranty.

Why Butler?

With over 20 years experience in the human service industry, we understand how important it is to buy furniture that lasts. Low cost furniture options are enticing, but lead to replacing furniture within a year or two, which means spending more time and money resulting in higher operating costs.

Sulfide (urine) Stain Resistant, Anti-Bacterial, & Anti-Microbial Vinyl Fabrics

Materials last longer in high use environments.

High-Density Back Foam

Superior comfort as well as back and lumbar support.

Reversible Seat Cushions

More than doubles useful life of cushion.
Available on most styles.

Engineered Lumber & Strong Joint Construction

Designed for high use environments.

10-Year Frame Warranty & 3-Year Fabric Warranty

10 times average retail warranty.
Rally offers 25 year warranty.

No-Sag Springs or Nylon Webbing in Seat & Back Support

Offers greater comfort and eliminates protruding spring coils.

Solid High-Density Compression Seat Foam

Greater comfort, prolonged support and cushioned definition.

Insulated Seat Deck

Reduced wear from spring contact.

Hardwood Frame Cross Rails

Thicker and stronger frame construction to stand up to tough environments.

Category	Standard Residential	Butler Upholstery
Solid Wood Frame	Usually pine or other soft wood	Plywood
Plywood Frame	3/8" to 1/2" Lauan, poplar or OSB	3/4" Engineered lumber
Frame Joinery	Cut off saw, butt joint, glued & stapled	CNC machined picture puzzle interlock
Seat Cushion	Coil spring & multiple foam, made with scrap foam	Solid foam
Seat Foam Density	Usually 1.5 lb. or less 25 ILD or less	1.8 lb. with 30 to 35 ILD - Optional HD foam
Back Cushion	Multiple layer 1.2 lb. 15 lb. ILD	1.5 lb. with 25 ILD
Seat Deck Support	No-sag springs, wide spacing	No-sag springs, closer spacing
Back Support	Small elastic webbing	Better back support with close spacing no-sag spring
Cover Fabric	15,000 rub cotton or synthetic	30,000 to 1,000,000+ nylon, olefin, and polyester
Thread Material	Usually cotton	Nylon, polyester or other strong synthetic
Frame Warranty	1 year or void for commercial use	10 year material & defect for structure
Fire Rating Compliance	Basic US minimum standard	Higher contract standard, Optional TB133

Renewable Custom Upholstery

We offer seating options that are component replaceable, providing easy replacement of worn or damaged furniture directly in the field. New components arrive with fresh foam and pre-applied upholstery covers for a quick swap with minimal tools and effort.

Environmental Friendliness

The uniqueness of our renewability and replacement system significantly extends the life of furniture, ultimately reducing contributions to the waste on our planet.

Construction

The methods create product longevity while providing great versatility, making on-site changes or repairs easy, often with one simple tool.

Wood

Our frame is made of hardwood and Baltic Birch plywood, providing more stability than ordinary solid hardwood framing that can crack over time.

Fabrics

Hook-and-loop closures keep the fabric securely in place, yet allow easy on-site removal for cleaning and replacement.

Foam

Only the highest quality, high-density foams are used, and are covered under warranty.

Moisture Barrier

A pliable waterproof membrane protects interior foams from any kind of liquid damage.

Replaceable Components

Arms

The arms are attached to the frame with four bolts, which are accessible from the underside of the chair and one bolt accessible after removing the seat cushion.

Chair Base

Includes a one-piece back and sinuous wire seat deck, can be replaced once all other components are removed.

Legs

Legs are attached to the underside of the arms with bolts. Every Chill unit comes with the required attachment points to accept either metal or wood legs, which are interchangeable.

Seat Cushion

Tethered to the chair frame using a fabric flap with hook-and-loop.

Built for Strength. Built for Care.

Every piece of Butler furniture includes features not found in retail furniture:

- Solid hardwood and plywood frames with dovetail-joint construction
- No-sag springs and high-density compression foam for comfort and longevity
- Reversible cushions to extend lifespan
- Anti-microbial, stain-resistant, urine-resistant fabrics
- Commercial-grade finishes designed for heavy use
- Three- to twenty-five-year warranty, depending on the product, for peace of mind
